

YUDHO MULYONO

JUNIOR PROGRAMMER | WEB DEVELOPER

082255323993 yudhomulyono8@gmail.com Sampit, Kalimantan Tengah

ABOUT ME

Informatics Engineering graduate with hands-on experience in web application development and information system projects. Skilled in building and maintaining web-based systems, working with databases, implementing user authentication and data management features, and performing testing and troubleshooting. Familiar with HTML, CSS, JavaScript, PHP, Laravel, MySQL, and REST API concepts. Interested in software development and backend engineering, with a strong willingness to learn new technologies and adapt to different development environments.

INTERNSHIP EXPERIENCE

IT Staff Intern

July - September 2025 | Pengadilan Militer I-06 Banjarmasin

- Developed a web-based information system for internship registration and participant management.
- Built and implemented application features, including user authentication, registration forms, data management, information pages, galleries, videos, and notifications.
- Developed and maintained the system using web technologies and applied responsive user interface design.
- Managed database integration and implemented data processing features to support system functionality.
- Performed testing, debugging, and troubleshooting to identify and resolve application issues.
- Contributed to system deployment and hosting to ensure the application was accessible and functional in a production environment.

ORGANIZATIONAL EXPERIENCE

Student Executive Board (BEM)
